

Debunking the Myths – The Science Behind Our Sexual Health

CHILD SAFEGUARDING STATEMENT

About Debunking the Myths- The Science Behind Our Sexual Health:

Debunking the Myths - The Science behind Our Sexual Health is a series of expert-led workshops and interactive tools for teenagers focused on sexual health, developed by the RCSI (Royal College of Surgeons in Ireland) Department of Obstetrics and Gynaecology in collaboration with the Rotunda Hospital to supplement the Relationship Sexuality Education (RSE) curriculum.

The aim of the project is to provide clear and factual information in relation to sexual health and stimulate open discussion and curiosity around the topic.

Delivered by a multidisciplinary team of healthcare experts from the RCSI University and Hospital group including consultants, junior doctors, community GPs, health psychologists, and researchers, the workshops explore a range of topics, including Human Papilloma Virus (HPV), contraception, anatomy, menstruation, fertility, consent, Sexually Transmitted Infections (STIs) and Sexual Assault Treatment Units (SATU). We aim to help teenagers learn more about these subjects in a non-biased and non-judgmental way.

In this context, the team at *Debunking the Myths* aims to create a safe, creative and fun environment where children can engage with our staff, where their welfare is paramount.

Debunking the Myths is committed to safeguarding the wellbeing of children while they are participating in our events. *Debunking the Myths* adheres to the requirements of the Children First Act 2015 (“CFA”) and the National Guidance for the Protection and Welfare of Children, 2017 (“Children First Guidance, 2017”) developed by the Department of Children and Youth Affairs. *Debunking the Myths* is also committed to protecting the data rights of children and is in compliance with the requirements of the General Data Protection Regulation (“GDPR”)

Debunking the Myths has specific legal responsibilities under the CFA, including to prepare a risk assessment of any potential for harm to a child while availing of their services, to prepare a ‘child safeguarding statement’ and to appoint a person to be a first point of contact in respect of *Debunking the Myths’s* child safeguarding statement (a ‘relevant person’). *Debunking the Myths* has appointed a Designated Liaison Person for child safeguarding in accordance with the Children First Guidance, 2017 who is also the relevant person for the purposes of the CFA.

2. List of services being provided:

Debunking the Myths provides a range of workshops and online campaigns that engage children.

- I. **Workshops:** Primarily, the team organizes sexual health education workshops led by a panel of 4 experts from RCSI University and Hospital group. The workshops are either online or in-person. Registration for the workshops is aimed at teachers. The team at *Debunking the Myths* does not engage directly with the registered participants. For the in-person workshops, the events require employees from the Department to assist during the 2-hour workshop. This involves directing people to seats, speaking to children and their teachers about contraceptive options, periods products or STIs testing kit while showing props. An evaluation is in place to assess the workshop's impact on students' sexual health knowledge and attitudes through two surveys. To participate in the evaluation, we need a Consent form signed by the parent/guardian, as well as an Assent form signed by the child. The study is regulated under the RCSI Research Ethics Committee, who assessed the Data protection and storage. All information relating to the study is summarised in a Participant Information leaflet, which is distributed to teachers to circulate to both students and parents. The team is also available to answer any questions. Only children with a signed consent form can participate in the evaluation. We are not able to link the survey back to the person who submitted it. the information does not make the subject identifiable. All staff with access to the data have completed GDPR training organised annually by RCSI. In cases where a disclosure about abuse or neglect is made anonymously - for example, through an anonymous feedback form or through Mentimeter (a tool we use during our presentations to gather anonymous questions from the audience)- the school will be notified, to enable them to address those who were present as a group and further highlight the support and resources available in the school, encouraging students to seek support.
- I. **Social Media Campaigns:** We utilise social media platforms to disseminate information regarding recent legislative advancements in sexual health, such as the introduction of the contraception scheme or SH:24. Additionally, we conduct campaigns tailored to addressing inquiries submitted anonymously by students during our workshops.
- II. **Public Events:** *Debunking the Myths* participates in a range of public events throughout the year, including the National Ploughing Championships. At these events *Debunking the Myths* typically attend with a group of team members, which compromise of RCSI employees from the Department of Obstetrics and Gynaecology. This involves raising

awareness of our workshops, handing over leaflets and answering questions from attendees.

- III. **Online Queries and Photos:** Queries from our website www.debunkingthemyths.ie are linked to general email debunkingthemyths@rcsi.ie. Most queries are from teachers and guardians. Some may be received from children. Typical queries from children could be enquiries to have their classroom participating in one of our workshops. Where further contact is required, a standard reply is formulated to request the child to engage their teacher/guardian to contact *Debunking* on their behalf. As part of the promotion of *Debunking the Myths* in the media and across other associated social media channels, photographs/video footage of children can be used only if parental consent has been obtained.

Risk assessment

We have carried out an assessment of any potential for harm to a child while availing of our services, including the area of online safety when accessing the internet. Below is a list of the areas of risk identified and the list of procedures for managing these risks.

	Risk identified	Procedure in place to manage risk identified
1.	Child is harmed by a staff member, while availing of our services	<p>A. All RCSI staff completes the induction briefing on the Child Safeguarding Statement, which is informed by the Children First e-learning training and incorporates training on the recognition of harm;</p> <p>B. RCSI staff is vetted in accordance with the Rotunda Hospital Garda Vetting Policy</p> <p>C. The Team has appointed a Designated Liaison Person.</p> <p>D. Where competitions are run, we never ask for the child's address without parental consent previously obtained.</p> <p>E. The team at <i>Debunking the Myths</i> obtains parental consent to take photographs and/or video footage of children. Individual or group photographs/ or video footage of children is not permitted without this consent.</p>
2.	The activity, or other material a child is exposed to, may be inappropriate and potentially harmful.	<p>A. All material used within the workshops or on social media undergoes revision from a healthcare expert who is going to deliver the</p>

		<p>talk to ensure the information is clear, appropriate, and science-based</p> <p>B. Debunking iPads/other IT devices at public events are pin-coded and used under supervision</p>
3.	A child discloses to a staff member that they are being harmed by persons either within or outside Debunking and this disclosure is not appropriately reported to the Designated Liaison Person or Tusla.	<p>A. “An introduction to ChildrenFirst” mandatory eLearning training for all staff</p> <p>B. The team follows the RCSI guidelines of the RCSI Child Safeguarding Policy for reporting child welfare and protection concerns;</p> <p>C. If any disclosures of harm are made to a staff member, they should contact the Designated Liaison Person as a matter of urgency to seek advice on any necessary steps to take.</p>

Procedures:

Our Child Safeguarding Statement has been developed in line with requirements under the Children First Act 2015, *Children First: National Guidance for the Protection and Welfare of Children* (2017), and Tusla’s *Child Safeguarding: A Guide for Policy, Procedure and Practice*. In addition to the procedures listed in our risk assessment, the following procedures support our intention to safeguard children while they are availing of our service (all procedures listed follow the RCSI Child Safeguarding Policy:

- Procedure for the management of allegations of abuse or misconduct against workers/volunteers of a child availing of our service;
- Procedure for the safe recruitment and selection of workers and volunteers to work with children;
- Procedure for provision of and access to child safeguarding training and information, including the identification of the occurrence of harm;
- Procedure for the reporting of child protection or welfare concerns to Tusla;
- Procedure for maintaining a list of the persons (if any) in the relevant service who are mandated persons;
- Procedure for appointing a relevant person.

All procedures listed follow the RCSI Child Safeguarding Policy are available upon request.

Implementation

We recognise that implementation is an on-going process. Our service is committed to the implementation of this Child Safeguarding Statement and the procedures that support our intention to keep children safe from harm while availing of our service.

This Child Safeguarding Statement will be reviewed on January 2025, or as soon as practicable after there has been a material change in any matter to which the statement refers.
